Work Experience

Stealth Health, San Francisco, CA **March 2013 - present**

Developed all software for interpreting data from radar sensor. Sensor produces data at the millisecond granularity. Researched and implemented time series techniques such as Moving Average, Spectral Analysis and Threshold Models. Used Python, Pandas, Numpy and Scikit-learn.

Education

BerkeleyX, *CS169.1x: Software as a Service* **Feburary 2013**

Completed a SaaS class on edx.org. Learned about RESTful architecture, SOA, cloud computing, Ruby, Rails, BDD with cucumber and TDD with Rspec.
https://verify.edx.org/cert/91f0b7d358aa4de697aac8aa9203d221

Worcester Polytechnic Institute, Worcester, MA **September 2008 – June 2012**

Bachelor's of Science, Computer Science

Completed coursework in Applied Statistics, Database Systems, Artificial Intelligence, Data Mining, Object-Oriented Analysis and Design, Algorithms, Calculus, Physics and Machine Learning.

Project Experience

Dezzmo **June 2013 - present**
Created a social networking site for artist. Built with Rails, Ruby, Javascript, JQuery, AJAX, devise, simple form, AWS S3 and Bootstrap. Built 3D portfolio/gallary using CSS3 3D animations and Javascript. Implemented the registration and signing in logic, uploading of images and following/follower functionality.
dezzmo-beta.herokuapp.com

Twitter Clone **December 2012**
Followed the tutorial ruby.railstutorial.org and gained a sold grasp of the Rails framework. Used Git, TDD, Bootstrap, PostgreSQL, Sass CSS and the Heroku platform to create a site with Twitter functionality. Handles user signups, gravatar, unique user identification and efficient SQL querying.

Historical Tax Rates visualization **October 2012**
Out of curiosity for the presidential debates, I plotted the tax rates of the richest and poorest americans throughout america's history. Using HTML, CSS, Javascript and D3.

Machine Learning for student modeling **September 2011 - June 2012**

Developed statistical models for predicting student responses to test questions. Performed data manipulations in Python, fast visualizations in excel and various models in R. Explored randomForests, SVMs, linear regression and neural networks. Best model achieved a 14% error rate.

Stratego Clone **September 2011 - October 2011**
Designed and programmed a complex strategy game in Java for an *Object-Oriented Analysis and Design* course. Built using TDD, iterative design and design patterns. Using the Factory, Singleton, Decorator, Facade and Observer patterns, we were able to program a game flexible enough to be extended to arbitrary dimensional boards, rules and pieces.
