SKILLS

Javascript, Reactjs, Django, Python, numpy, pandas, celery, Bootstrap, React Native, Redux, Postgres, Nodejs, Amazon s3, ec2, redshift, sagemaker, CSS, Transition animations, keyframe animations, Chrome lighthouse, Mobile Responsive Design, lodash, Box Model, webpack, SASS, JIRA, Kanban, Kafka, microservices, Full Stack development, Java, EKS, Docker

EXPERIENCE

October 2022 - May 2023

Hayden5, New York, NY – *Full Stack Engineer Invoices* – https://hayden5.com/

- Developed a project management tool for the video industry using Python, javascript and sql to fulfill customer needs. Upgraded Django 1.9 app to django 4.1. Upgraded app from python 2.7 to python 3.9.
- Refactored Worked with nontechnical stakeholders to spec out Invoice PDFs and generated them in a scalable way on AWS. Emails sent in production with Amazon SES.
- Interfaced with SignNow third party API to store financial information. Securely stored signed documents like W2s, contracts and tax forms for contractors.

January 2020 - September 2022

Rayogram, New York, NY – *Fullstack Engineer*– http://alkeoncapital.com/

- Developed Calendar for Hedge fund that adhered to all SEC requirements and integrated with their bloomberg terminal. Software is responsible for over $60B in assets under management. Collaboratively lead a team of 4 (2 junior frontend, 1 devops, 1 backend). Using Django, Flask, Celery
- Developed custom visualizations using jquery, datatables.js, D3.js
- Built python service to perform image processing on monthly pdf reports to investors. pdf2image, img2pdf, poppler, pdftoppm, RFC822 (email)

February 2018 - September 2019

Huge Inc, New York, NY – *Full Stack Engineer* – https://www.hugeinc.com/

- Setup and owned all backend infrastructure for an immersive pop-up shop in Kobe, Japan.
- Implemented Backend application in Node.js on Amazon Web Services using Express.js and communicated with browsers over Websocket.
- Setup and owned continuous integration, continuous deployment pipeline using Jenkins, docker containers and Amazon Container Registry Service.

February 2016 - February 2018

Capsule Corp, New York, NY – *Fullstack Engineer* – http://capsulecares.com/

- Developed an ETL pipeline using python, numpy and pandas. The pipeline would extract data from the Django/Postgres database on aws rds and load the data into a Datawarehouse on aws redshift. ETL was a microservice. 5th engineer at a quickly growing startup.
- Added Segment.io events recording user actions for improving conversion funnel and user dropoffs.
- Inherited and extended a Node.js application that performed SQL query reflection from a GET request to a query against a Microsoft SQL database within a corporate network.

August 2014 - July 2015

Freecodecamp, San Francisco, CA – *Software Engineer* - https://freecodecamp.org

- Wrote fullstack application using React.js and node.js.
- Managed Node.js infrastructure on DigitalOcean and using pm2. Infrastructure served over 10,000 concurrent connections at peak.

OPEN SOURCE PROJECTS

- Django-flaggit - forked a django app to fix a bug and support modern versions of django
- React Native Contacts - the most popular module for loading phone contacts in React. Written in Javascript, Objective-C and Java.

EDUCATION

2008 - 2012

Worcester Polytechnic Institute, Worcester, MA – *Bachelor's in Computer Science*

Completed coursework in Computer Networks, Databases, Web Applications, Algorithms, Artificial Intelligence, Software Development, Object Oriented Design and Functional Programming.
